

Vaccination

EXPECTATION [51-0714]

I went into a place to pray for a boy that had tubercular meningitis. He was dying. And the person said, "Oh, Brother Branham," said, "my," said, "you'll get meningitis." She said, "I run my children out. I give them vaccinations."

I said, "Such faith as that would give them meningitis." That's right.

You must believe. All things are possible to him that believes.

COME LET US REASON TOGETHER [55-1004]

Now, notice, in here--this--when they find some kind of a serum, that'll--that'll help somebody, my, the newspapers publish it everywhere. My, penicillin, or something, oh, how they just flash it everywhere. This Salk vaccine, and so forth, how they flashed it everywhere, because they found something that would help people.

I'm salute those people; God bless them. I'm so happy for that. But they'll publish that in every little newspaper throughout the nation. And Almighty God can make the blind to see, and the deaf to hear, and the dumb to speak, and they'll turn it down and won't put it in the paper. Say, "It's fanaticism."

COME LET US REASON TOGETHER [55-1004]

Look, do you know medicine kills just about as many almost as it cures? It don't cure anybody, but it helps. That's right. It just keeps it clean, while--aids nature, while God does the healing.

Look how many people--look when this Salk vaccine come out, look at the thousands of little children that died with that vaccine. They give them children that to give polio and killed them. Well, then, if somebody prays for the sick and it dies, say, "Fanaticism." And they give the vaccine and say, "Glory, hallelujah, oh, just look what it done. My this great guy discovered this." Is that right?

LED BY THE SPIRIT OF GOD [56-0723]

So happy to know that someday He will be here, and all the troubles will be over. Just seeing Chicago, after even all their Salk vaccines and everything, the cases of polio is on the rage, till my, my, worse than it ever was.

And seems like about time one thing gets started common, why, another thing starts up. And they give some sort of medicine for something, then looks like it'll take care of that, and in a few years here turns up and gives a great thing that nearly kills the patient then. So only thing we can hold for is the coming of the Lord. That's when all troubles will be over.

EXPECTATIONS AND LEADINGS OF THE SPIRIT [57-0811E]

And I believe that all healing comes from God. I do not condemn doctors. I think that doctors are God sent to us. Hospitals and clinics, do I condemn them? I constantly pray for them, that God will give them knowledge to help poor suffering humanity.

And I'm very grateful to God for everything that He's done, for penicillin, for the Salk vaccine, for everything that He's done, and pray that the hour will soon come when they'll find something to curb cancer and--and the other diseases. If it ever comes, it'll have to come through God alone. I think if we Christians would spend much time praying for that, we'd be better off, to the whole human race.

WHY? [59-0813]

Now, there was a time when there wasn't any toxin for smallpox. There was a time when the Salk vaccine for the children in polio, they didn't have that. But they got it now. They've got it.

WHY? [60-0309]

There was a time when there was no toxin for typhoid fever. There was no... Just recently they got the Salk vaccine for the--for the children, for the a--the polio. There was a time they didn't have it. They got it now. There was a time there was no a--inoculation for a--a typhoid fever, and tetanus, and typhus shots, they didn't have it. But we got it now.

WHY? [60-1126]

You know there was a time when there wasn't any toxin on the earth for smallpox. Many died with smallpox, because there was no toxin. Diphtheria, no toxin, but now you can get inoculated from that. When an epidemic breaks out in the city, quickly you go down and get a smallpox vaccination or a diphtheria shot. They got toxin. I'm thankful for that. I'm glad of that. I'm glad we got it. And the Salk vaccine for little children, I thank the Lord for that. Pray that He will give us more and more.

I believe if we just warm up to God, there's things here for us. We was made out of the earth, you know. If we just warm up to Him, and pray to Him, and quit our wickedness and things, all these things would be found. That's right, but for you who believe, He's got a remedy beyond that. Certainly He has. Now, it's all made and ready for you.

There was a time when the toxin, there wasn't any; and many people died from the diseases. But now you can be inoculated.

THE UNCERTAIN SOUND [60-1218]

I'm interested in medicine, certainly am, anything that'll help God's people, help human beings. If it's peace, studying peace terms, I am interested in that. I am interested in a--a better community to live in. I'm interested in better schools for our children to go to. I'm interested in anything that's good, wholesome and right.

And medicine has done some great things. I believe God has used it in many things. I believe, if we'd be more sincere and consecrated to God, they'd already had stuff for cancers and everything else. If we just... God's got the thing, if we'd just ask Him about it. See? So now, I believe the reason the Salk vaccine was, just because of little children suffering the way it is. And Satan, that evil thing out there, paralyzing them little children and things; and God just let that be discovered, for the inoculation. And it's done a great thing, and to which we are grateful to Almighty God for it.

WHY? [61-0125]

And I thank God for every serum that they got, for the Salk vaccine. Pray constantly that God will give us something for cancer, for poor suffering people. Anything can do to help, I'm for it. Yes, sir, I'm a hundred percent for it. And if we Christian people would pray more for such things as that, we'd be better off. The whole country would.

WHY? [61-0125] There was a time when we didn't have toxin for typhoid fever, a time when we didn't have toxin for--the--the Salk vaccine and stuff like that, and--but now we got it. That's exactly. We got it now.

WHY [61-0128]

Now, you know it's dangerous if you've got a disease, and the--and the doctor's got a toxin for that disease, and you don't go get inoculated. Like smallpox--a epidemic in the land of smallpox--if you don't go get vaccinated, you could die with them smallpox. Like the great Salk vaccine now. You say, "You believe in Divine healing, and talking about medicine?" Oh, yes. Uh-huh.

WHY [61-0128]

I'm thankful to God for these toxins, and the Salk vaccine. And it's a dangerous thing to not take it. The little children, and things, to get inoculation, what would we do without such?

Now, everybody can't have faith for healing. They should, but they don't. So what would you do? You'd just have sickness, and, oh, it would be a terrible place if we had no hospitals, or things. It'd be an awful place if you didn't have hygiene, and so forth, health clinics, and what we have. We thank God for everything that we've got. Every good thing cometh from God. Certainly.

WHY [61-0413]

If you refuse to take the doctor's medicine, it's dangerous. You might die if you don't take the doctor's toxin. You might die, and that's dangerous to not take it. Like the Salk vaccine, like the smallpox...

When I go overseas I--I... They believe... They--they give me so many shots I look like a guinea egg to get into places where they just, the shots--shots with yellow fever and--and all kinds of toxins. They say that keep you from taking it. I didn't want to take it, but you have to take it anyhow. So that's all right.

You say, "Brother Branham, do you believe in medicines?" Why sure, certainly. They are God-given things; we believe that. But that ain't what heals you. What if we didn't have health and hygiene, what would we have? The way the people has accumulated on the earth today and how many things. If the hospital is not of God, then burn the thing down; it's antichrist. See? Sure, but it is of God... But they don't do no healing. They are just a place to keep you away, and to help you, try to keep you clean while you... If you are ever healed, God healed you.

WHY [61-0413]

A man's got toxin and--and Salk vaccine for these little children, and now polio. I pray daily that God will send us something for cancer.

If we can't have faith, let's get something else. Faith is the first. Let's take the next best if we can't get that. Look at the world in the condition it's in: poor suffering humanity. Help everybody you can. Everything that helps is of God. Let's help; let's do everything we can and pray for men. The thing to do, brethren, is get our arms together, both medicine, doctors, hospitals, nurses, church, and all together, and put our faith in God and move forward. That's what we need. God's going to ask us why we didn't do it some of these days.

GOD'S PROVIDED WAY [61-0516M]

What if we had something that they could say they could make a--a man that's--that's dying with cancer, come back and be well again? Would that not be an achievement? Like the Salk vaccine for the children, it went worldwide.

HE CARES, DO YOU CARE? [63-0721]

And the remedy has been proven to cure the patient, and the patient reads all about the--the discovery of this drug, and they know every ounce of medicine that's in it, they know all the--the scientist's name that found this certain drug, like the Salk vaccine and so forth. If we--if we know all the Word about It, but refuse to take It, It won't help us.

THE KEY TO THE DOOR [62-1007]

When polio struck the nation. As, we're all commanded now to go get this vaccine, to stamp it out. When polio struck... Yesterday I was listening to a doctor as I was driving over the road, some doctor from Louisville. He said, "A few years ago, when the great plague hit Louisville," said, "if men would have stood where I did, and saw fifty-seven respirators at one time, and men, women, boys and girls, paralyzed with a disease called 'polio,' and there was nothing could be done about it." Said, "I never want to see a thing like that again."

But science thought, "If there is such an evil as polio, there surely is something to counteract it." They fought, they stood on the streets with boots, those firemen, they put hats out, and they begged, they bummed, they done everything, trying to find the key to unlock the door to liberty. And, finally, one Christian gentlemen by the name of Salk found the vaccine. Why? There was an evil at stake, there was a killer at stake; there was a key somewhere that could unlock freedom again for man, and the Salk vaccine was the great treatment. Oh, what the key can do! The vaccine was brought forth, and now is stamping out the polio with this vaccine, because that it was a "never tiring and never give up," that key laid somewhere. There was something would inoculate from it, and they were determined to find it.

THE WAY BACK [62-1123]

We had in our country just now that Salk vaccine. They asked everybody to take it, young and old, to inoculate from this horrible polio. And everybody, thousands went in to take it. And how did they--how did they do that?

You see, you find out in taking doctor's medicine... You know, it'll work on some people, and then it won't work on the others, because that you know, everybody ain't made alike.

Now, we have this penicillin. I carry a card in my pocket so that if I'd ever have an accident, a doctor must never give me penicillin. It would kill me. So it'll kill some people and help others, because this serum doesn't work just right on all the people.
